SUMMARY

Information Technology senior at NJIT with experience in web development, Linux environments, WordPress performance optimization, DNS/SSL configuration, SSH/SFTP, and backend development with Java, Python, PHP, and SQL. Seeking an IT, Web Development, Cloud or DevOps internship role.

EDUCATION

New Jersey Institute of Technology — B.S. Information Technology

Newark, NJ | Expected Dec 2026

Brookdale Community College — A.S. Computer Science

Lincroft, NJ | May 2022

TECHNICAL SKILLS

Languages: Java · Python · C / C++ · PHP · JavaScript · SQL

Web & Frameworks: WordPress (Elementor, Gutenberg, ACF) · HTML · CSS · REST APIs

Systems / DevOps: Linux (Ubuntu, CLI) · Bash · SSH / SFTP · WP-CLI · Cron Jobs · Git / GitHub · Netlify CI/CD

Tools & Platforms: MySQL · MySQL Workbench · FileZilla · LocalWP · SiteGround · WP Engine · Cloudflare (DNS/CDN)

Concepts: CI/CD · SEO Optimization · Web Performance Tuning · Auth & Security (CSRF, Hashing, Sessions) ·

EXPERIENCE

Industry Media — Web Developer

Hazlet, NJ | Aug 2023 – Present

- Developed and maintained WordPress sites for enterprise clients), improving reliability and brand consistency across production environments.
- Optimized site performance using Query Monitor and Asset CleanUp, reducing load times and improving Core Web Vitals scores.
- Managed deployments and site migrations via SSH, SFTP, and hosting platforms (WP Engine, SiteGround), maintaining 99.9% uptime.
- Implemented SEO strategies (JSON-LD structured data, meta tags, sitemaps) increasing organic traffic by 20%.
- Automated maintenance workflows (plugin updates, backups) using WP-CLI and Bash scripting, reducing manual overhead.
- Debugged PHP errors, plugin conflicts, and server misconfigurations in production Linux/Apache environments.

Smart Marketing — Web Designer

Eatontown, NJ | Jan 2023 – Aug 2023

- Develop optimized website layout prioritizing mobile responsiveness which led to increasing average session durations by at least 30 seconds while enhancing overall cross-device functionality and accessibility.
- Implemented on-page SEO (schema markup, keywords, meta tags), lifting client search rankings.
- Optimized load speed and site architecture, reducing bounce rates through web performance best practices.

PROJECTS

Secure Business CorePanel Dashboard

PHP · MySQL · CSS · Apache

- Built a secure PHP-based CRUD application with authentication and role-based access control (RBAC) for users, projects, images, and receipts.
- Implemented security features: password hashing (Argon2), CSRF protection, session management, and activity/audit logging.
- Deployed and managed on SiteGround in a production Linux/Apache environment with custom routing configuration.

Programming Language Parser

C++

- Designed a recursive-descent parser performing syntax analysis, semantic checks, and runtime execution of MCL code, reinforcing compiler design principles.

Restaurant Ordering System

Java · SQL · CSS

- Developed a desktop application supporting real-time order placement, dynamic menu updates, and MySQL back-end persistence with transaction logging.
